### **SESSION DESCRIPTION:**

[An intelligent electronic system incubates a number of technological advancements at-par to the latest innovations in the field of Intelligent, Reliable and Efficient Systems, Internet-connected computer, IoT and incorporation of Artificial Intelligent applications covering various facets such as catering to procurement and analysis of data, communication with other systems, capacity to learn from experience, security, connectivity, the ability to adapt according to current Parameters and the capacity for remote monitoring and management etc. The conference aims to provide on international forum for the presentation and discussion of the Technical Facets of Intelligent Systems.]

#### **RECOMMENDED TOPICS:**

Topics to be discussed in this special session include (but are not limited to) the following:

- [Block chain Technology
- Artificial Intelligence capabilities in various domain
- Machine Learning and IoT
- Deep Learning and Data Science
- 5G Networks and Communication
- Wireless Communication
- Embedded Systems and Robotics
- Application of Data Science in Management
- Agriculture and Environmental Technologies]

## **SUBMISSION PROCEDURE:**

Researchers and practitioners are invited to submit papers for this special theme session on **[Technical Facets of Intelligent Electronic Systems]** on or before[30<sup>th</sup> March 2021]. All submissions must be original and may not be under review by another publication. INTERESTED AUTHORS SHOULD CONSULT THE CONFERENCE'S GUIDELINES FOR MANUSCRIPT SUBMISSIONS at <a href="http://icdam-conf.com/paper\_submission.html">http://icdam-conf.com/paper\_submission.html</a>. All submitted papers will be reviewed on a double-blind, peer review basis.

**NOTE:** While submitting paper in this special session, please specify [insert special session title] at the top (above paper title) of the first page of your paper.
